

FedEx RESTful API Label Validation Cover Sheet

Section 1 – CUSTOMER INSTRUCTIONS

This label evaluation cover sheet must be used when submitting your labels for review by our Label Validation Group. Upon receipt of your labels, you will receive the evaluation results within three business days. If your labels are approved, you will receive an email notifying you that you are now a production user with instructions as to how to point your application to our production environment.

NOTE: In order to avoid SIGNIFICANT processing delays in your evaluation efforts, it is imperative that this cover sheet accompany each packet of labels that you submit for review.

Make sure your labels have been printed out and scanned if sending via email. Make sure they do not have blurred images, and that the barcodes are crisp with no lines through them.
